Atatürk Faculty of Education

Marmara University Atatürk Faculty of Education

Department of Chemistry Education

The department of chemistry education aims to raise teachers with strong subject and pedagogical content knowledge as well as to ensure that teachers possess a universally accepted level of teaching-competence, and are confident, critical thinkers. Our students graduate after four years of training with Bachelor Degree

20 students are accepted to the department every year. The undergraduate training program is conducted in collaboration with the Chemistry Department of the Faculty of Science and Arts. Academic staff consists of experts chemistry educators who have Ph.D degrees from national and international universities.

Education

The undergraduate program consists of subject-matter courses, general cultural courses and pedagogical content courses. The duration of the program is 4 years and the courses are offered at both theoretical and experiential levels. In addition, graduate programs leading to M.A. and Ph. D. Degrees are offered in accordance with the regulations of the Institute of Educational Sciences.

Facilities

Students are offered opportunities to participate in the national and international research projects that are carried out in the department, thus improving their research skills. There are three laboratories fully equipped to address students' needs. Subject-matter training involving conducting experiments to teach chemistry, technology integrated chemistry education applications, teaching models and material designing are conducted in these laboratories. There is also a classroom equipped for multimedia applications.

Employment Prospects

The graduates of the program can work as chemistry teachers in state or private schools. They are also eligible of for admission to M.A programs in chemistry, chemistry education and science education departments.
