Invitation to Join the Graduate Studies in Environmental Engineering at Marmara University

Dear science and engineering students,

I invite you to apply for admission to our master's or doctorate program in environmental engineering. I would like to take this opportunity to give you some important information that can help you in your decision:

We have a relatively young and very active faculty, with expertise in many diverse areas of environmental engineering such as water treatment, wastewater treatment, air pollution modeling, air pollution control engineering, solid and hazardous waste management, sludge treatment, filtration, fluidization, hydraulics, and mathematical modeling. Please see our web pages for detailed information about our department. I strongly recommend that you review the pages giving information about faculty members and their research interests. There are separate pages giving lists of international publications by the members of our
